Product List

# Introduction

M.I.S. Logic LTD is a new emerging company introducing itself as a complete service provider of business consultancy, financial, and technological services. With deep expertise and knowledge of market needs, we have a professional approach when competing in providing services of high quality and even beyond.

MIS Logic LTD team are a group of qualified, smart, and driven people who dedicate themselves to get the job well-done. At MIS Logic LTD, each individual represents the spirit of the whole team and is aware of how limitless is our potential to grow.

This PowerPoint will be a small introduction to some of our products with a small explanation about each product

Product Name	Volume Limiting	Leverage Management	Margin Controller	Bonus
<b>Functionality</b>	<ol style="list-style-type: none"><li>1) Limit the amount of net open positions (Lots) per security per MT4 Group</li><li>2) Hedged positions are excluded from the calculation of net positions</li><li>3) Automatically reject opening new positions or closure of hedged positions to prevent exceeding the defined volume</li></ol>	<ol style="list-style-type: none"><li>1) Define maximum allowed leverage based on equity balance ratio</li><li>2) Scan &amp; Update leverage level in the accounts based on the predefined equity/balance ratio</li><li>3) Inform clients and group managers about any changes via internal mail</li></ol>	This plugin aims to prevent traders from abusing the hedge facility where some of them accumulate multiple positions in opposite direction and end up by closing all the positions in one direction and have a bigger amount of lots than his margin allows him to. Closure of hedged position is rejected and the message: "No available Margin is displayed"	The plugins' purpose is to prevent traders who get a bonus ( virtual credit ) from consuming it in case of Stop Out

Product Name	Risk Manager	IP Address Detector	Trading Time Control
<b>Functionality</b>	<p>1) Scan MT4 groups on hourly basis and detect the following:</p> <ul style="list-style-type: none"> <li>a. Pip Hunter: A trader that always closes the trade at a certain number of pips</li> <li>b. Hit &amp; Run: A trader that always closes a trade after a certain time</li> <li>c. Equity Spike: An account whose account's equity increased by a certain percentage</li> </ul> <p>2) Change the color of the accounts based on category for easier recognition</p> <p>3) Sending an email to predefined emails where each account and the type it belongs to is obvious</p>	<p>1) Detect and send IPs to to the admins on daily basis</p> <p>2) Used to prevent malicious logins done by the accounts</p>	<p>The aim of plugin is to prevent trading for a predefined interval of time, or between opening &amp; closure per trade to prevent scalpers / hitters &amp; runners</p>

Product Name	Feed Monitoring	MT4 Server Monitor	MT4 – SMS service	IB Plugin
<b>Functionality</b>	<ol style="list-style-type: none"><li>1) Monitor the Market watch and notify admins about a frozen price per symbol</li><li>2) Notification occurs via email</li><li>3) Disable trading on wrong quote due to freezing prices</li><li>4) Notify admin and enable trading after the feed is restores</li></ol>	Monitor the MT4 server and notify admins if it is down for a predefined period of time	<p>Send SMS to clients to alert them about:</p> <ol style="list-style-type: none"><li>1. Deposit/Withdrawal /Credit In/Credit out transaction</li><li>2. When SL/TP order is filled</li><li>3. When margin call level is hit</li><li>4. Send Breaking news</li></ol> <p>Also, sms can be sent to subscribers of your website to increase the creation of leads</p>	Automatic calculation and distribution of commission between several number of IB. It occurs based on security level and in terms on Money or Pips

Product Name	Advance Bonus	Auto Bonus	MT4 Web API	Hedging Manager
<b>Functionality</b>	Convert Bonus credit given for some accounts to real cash deposit after the closure of certain amount of lots. The conversion can be for either the full or partial amount of the credit	This plugin allows you to define a bonus that is automatically deposited in the account when a cash deposit occurs. This can be for the first deposit only or on every deposit done. The bonus is a certain percentage of the deposit done and is predefined in the plugin.	This plugin allows external web apps to communicate easily with the mt4 server. It can read, write, adjust records in MT4.	<ol style="list-style-type: none"> <li>1) Non-dependent MT4 to MT4 bridge to connect two MT4 accounts to each other</li> <li>2) Easy setup with no need to access the server of the account or the LP</li> <li>3) Bridging can occur on Group, account, or symbol level</li> </ol>

Product Name	Virtual Dealer	Weekend Manager	Automatic Rollover	MT4 Account Copier
<b>Functionality</b>	<ol style="list-style-type: none"><li>1) Automate the execution of orders on MT4</li><li>2) Define risk profiles to categorize type of clients</li><li>3) App risk profiles on group / account / symbols / security level</li></ol>	This plugin deletes all SL/TP during the weekend to avoid gap hunting. It also clears negative balances, and can change margin requirements on weekends.	This plugin automatically closes all positions on expired future contracts on market price and reopens the trades on the new contract on market price.	Allows you to copy one or many mt4 accounts from one server to another including personal details and full account history.
